Objective and Characteristics of the Fund

iFreeETF TOPIX High Dividend Yield 40 Index

<Investment Objective>

The Fund aims to match the rate of change of NAV per unit of the Fund to that of TOPIX High Dividend Yield 40 Total Return Index (hereafter referred as the “Index”).

<Characteristics of the Fund>

(1) The Fund will invest in stocks that are included and scheduled to be included in TOPIX High Dividend Yield 40 Total Return Index to match the rate of change of NAV per unit of the Fund to that of TOPIX High Dividend Yield 40 Total Return Index.

- To achieve the above, the Management Company may give instructions to adjust the components of the trust assets (including instructions to utilize stock index futures etc.).
- The Fund shall not invest in derivative transactions as defined in Article 61-5, Paragraph 1 of the Corporation Tax Act, except for the following purposes,
 - (a) To realize the same gain or loss as if the assets in which the investment is made were held,
 - (b) To reduce risks arising from price and interest rate fluctuations on assets or liabilities of the trust asset.
- Depending on the market trends, and the size of Fund, etc., the management set out above may not be achieved.

<About TOPIX High Dividend Yield 40 Index>

Investment Risks

Factors to cause fluctuation of NAV per unit

- The Fund invests in marketable securities, the price of which fluctuates significantly, the NAV per unit of the Fund may also vary. Consequently, the original invested amount cannot be guaranteed. And all profit or loss accrued to the trust assets will be borne by the investors.
- Investment trusts are not same as a savings deposit.

Major factors to cause fluctuation of NAV per unit:

Stock Price Volatility (Price Volatility Risks, Credit Risks)	Stock price changes based on the political and economic conditions, operating results of the issuer, and market supply and demand for the security. If the issuer becomes operationally distressed or goes bankrupt, all or part of invested amount might not be returned. If the price of stocks included in the trust assets falls, the NAV per unit may fall below the invested amount.
Other risks	When the trust assets of the Fund are invested in money market instruments such as call loans and/or certificates of deposit, losses may accrue due to default of the issuers of such instruments (the Credit Risk). This may cause the NAV per unit to decline.

*The factors to cause fluctuation of NAV per unit are not limited to those mentioned above.

Additional Considerations

- The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called the “cooling-off period”) is not applicable to the investment to the Fund.
- In the event of a large number of redemption and required to provide funds for the redemption in a short period of time, or a sudden change in the market environment in major financial markets, the fund may temporarily reduce the liquidity of its assets, bear risk of not being able to trade at the prices expected from the market conditions, and risk of limiting the amount of transactions. This may cause a negative impact on NAV, may suspend redemption request, and may delay the payment of the redemption proceeds.

Risk Management System

- Based on the Investment Risk Management Policy set by the Board of Directors, the departments or committees in charge at the Management Company, which are independent from the fund management departments, will manage the risks by monitoring and overseeing the fund management department directly or indirectly.
- The Management Company will establish rules for liquidity risk management, monitor the liquidity risk of the fund's assets, and formulate and validate contingency plans.
- The Board of Directors will oversee the Company's liquidity risk management system and ensure appropriate implementation of liquidity risk management.

Additional Items

■ Points to note in relation to fluctuations of NAV per unit

The Fund aims to match the rate of change of NAV per unit of the Fund to that of TOPIX High Dividend Yield 40 Total Return Index. However, we cannot guarantee that movements of NAV per unit will be exactly identical to those of the index for the following reasons:

- (a) We cannot make composition ratio of individual stocks in the Fund to be identically the same as the Index in terms of total market capitalization.
- (b) The Fund may incur expenses including management fees (trust fees), brokerage commissions, etc.
- (c) The stock prices used for trade execution could differ from those used for NAV calculation.
- (d) The stock prices used for calculation of the Index could differ from those used for NAV calculation.
- (e) The movement of index future price could differ from that of the Index (when index future is utilized).
- (f) The impact of the replacement of stocks included in the Index or the change of Index calculation methods.
- (g) The accrual of cash position in the trust assets, which arises from additional subscriptions, dividends received, etc.

※ As of the end of August 2023, index futures of TOPIX High Dividend Yield 40 Index have not been traded. Index futures other than such index may be utilized.
