- The investment trust assets are separately managed by the Trustee under the Trust Act.
- A copy of prospectus issued upon request could be obtained from a distributor. If you request this document, please make a personal record to that effect.

## Objective and Characteristics of the Fund iFreeETF Nikkei225 (Quarterly Dividend Type)

### <Investment Objective>

The Fund aims to match the rate of change of NAV per unit of the Fund to that of Nikkei 225 Total Return Index.

### <Characteristics of the Fund>

(1) The Fund will invest in stocks that are included and scheduled to be included in Nikkei 225 Total Return Index to match the rate of change of NAV per unit of the Fund to that of Nikkei 225 Total Return Index (which may be referred as to the “Index” hereinafter).

- In principle, the Fund aims to invest in all the stocks included in Nikkei 225 Total Return Index.
- To achieve the above, the Management Company may give instructions to adjust the components of the trust assets (including instructions to utilize index futures).
  - The Fund shall not invest in derivative transactions as defined in Article 61-5, Paragraph 1 of the Corporation Tax Act, except for the following purposes, which are prescribed for the purpose of securing stable income and efficient management.
    - (a) To realize the same gain or loss as if the assets in which the investment is made were held
    - (b) To reduce risks arising from price and interest rate fluctuations on assets or liabilities of the trust asset.
  - Depending on the market trends, and the size of Fund, etc., the management set out above may not be achieved.

### <About Nikkei Stock Average (Nikkei 225)>

#### A) About Nikkei 225

- The Nikkei 225 (Nikkei Stock Average) is an index developed by Nikkei Inc. and constituents of 225 stocks are selected from Tokyo Stock Exchange.
- Nikkei 225 started its equity index calculation from 1950 and is one of the representative equity indices for Japanese stock market.

## B) Calculation Method

$$\text{Nikkei 225} = \text{Aggregate Price of 225 stocks included in the index (*1)} / \text{Divisor (*2)}$$

(\*1) Stock price used to calculate the index may be adjusted according to a predetermined method.

(\*2) Nikkei 225 Index employs price-weighted averaging (index constituent has an equal weight in the index); the aggregate stock price of 225 stocks divided by 225 will be the price of the Index. But splits and constituents revisions will prevent from consistency in the calculation of the Index. Nikkei will maintain its consistency by adjusting the divisor.

## C) Management of the Nikkei 225 (Index selection method)

The constituents of Nikkei 255 are selected from highly liquid stocks of the Tokyo Stock Exchange. The constituents (stocks) will go through an Annual Review twice a year, but in case of mergers / bankruptcies, immediate review (Non-Annual Review) will be conducted.

During the Annual Review, low liquid stocks are replaced by higher liquid stocks which are not the current constituent of the Nikkei 225. Additionally, sector-weighting will be considered as to maintain its balance.

As for the Non-Annual Review, in principal, stocks delisted from Tokyo Stock Exchange will be replaced by the most liquid stock from the same sector.

The decision of new stocks to be included in the Index and elimination of stocks from the Index will be made by Nikkei Inc. with the support of academic experts and specialists.

\*Management of the Nikkei 225 (Nikkei 225 Index selection methodology) will be reviewed considering the market environment and change in the economic conditions as well as legislative / regulatory changes.

- The Nikkei 225 and Nikkei 225 Total Return Index are calculated by a method independently developed by Nikkei Inc. (hereinafter "Nikkei"), is a copyrightable work. Nikkei owns the copyright and any other intellectual property rights in The Nikkei Indexes themselves, and the method for calculating The Nikkei Indexes and the like.
- All ownership of trademarks and any other intellectual property rights with respect to marks representing "Nikkei Inc.," "Nikkei," and The Nikkei Indexes belongs to Nikkei.
- The management of the Fund is the responsibility of the Management Company and Nikkei Inc. has no responsibility for its management or the transactions of the Fund.
- Nikkei is not obliged to continuously publish The Nikkei Indexes, nor is it liable for any error or delay in, or discontinuation of the publication thereof.
- Nikkei owns the right to change the content of The Nikkei Indexes, such as the calculation method thereof, and the right to suspend the publication thereof.

(2) The structure of the Fund differs from that of the standard unlisted investment trusts.

- The units are listed on Tokyo Stock Exchange and can be traded in the same manner as listed stocks.
  - Trades may be made by minimum 1 unit.
  - The method of trading is generally the same as that of stocks.
- Subscription of additional units may be made for stocks.
  - Subscribers of additional units must apply for the Subscribing Basket at the time of subscription (which is the basket composed of the stocks included in Nikkei 225 Total Return Index in the ratio designated by the Management Company as equivalent to the component ratio of the stocks included in Nikkei 225 Total Return Index)
  - Unless specified otherwise, subscription for cash will not be accepted.
- Units may be exchanged for stocks
  - Unitholders may apply to the Management Company for exchange of the units belonging to them in integral multiple of the number of units designated by the Management Company for the stocks equivalent to the portion of the trust assets represented by the units.
  - Units may not be redeemed for cash.
- Distribution will be paid to registered unitholders
  - Registered unitholders are those whose personal names or corporate names, addresses, and personal ID numbers or corporate ID numbers (or, personal names or corporate names, and addresses, in case of persons who do not have personal ID numbers or corporate ID numbers or who receive distributions through payment handling persons as provided for under Paragraph 1 of Article 9-3-2 of the Act on Special Measures Concerning Taxation) are registered by the Trustee as of the last day of each calculation period.

(3) The distribution will made, in each calculation period, in the full amount of dividends received, interests received and other incomes arising from the trust assets after deduction of interests paid, management fee (trust fee) and other expenses similar to these.

Accounting Day is the January 10<sup>th</sup>, April 10<sup>th</sup>, July 10<sup>th</sup>, and October 10<sup>th</sup> of each year.

\*There is no guarantee of the payment or the amount distributions in the future.

### Major Investment Restrictions

- There is no restriction on the investment ratio in stocks.
- The Fund will not invest in assets denominated in foreign currencies.

## Investment Risks

### Factors to cause fluctuation of NAV per unit

- The Fund will invest in financial instruments whose prices fluctuate and as a result the NAV per unit of the Fund will also fluctuate. Therefore the invested amount will not be guaranteed and a loss of principal may be caused. All the gains and losses accrued to the trust assets will be attributable to the investors.
- Investment trusts are not deposits.

### Major factors to cause fluctuation of NAV per unit:

Stock Price Volatility (Price Volatility Risks, Credit Risks)	Stock price changes based on the political and economic conditions, operating results of the issuer, and market supply and demand for the security. If the issuer becomes operationally distressed or goes bankrupt, all or part of invested amount might not be returned. If the price of stocks included in the trust assets falls, the NAV per unit may fall below the invested amount.
Other risks	When the trust assets of the Fund are invested in money market instruments such as call loans and/or certificates of deposit, losses may accrue due to default of the issuers of such instruments (the Credit Risk). This may cause the NAV per unit to decline.

\*The factors to cause fluctuation of NAV per unit are not limited to those mentioned above.

### Additional Considerations

- The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called the “cooling-off period”) is not applicable to the investment to the Fund.
- In the event of a large number of redemption and required to provide funds for the redemption in a short period of time, or a sudden change in the market environment in major financial markets, the fund may temporarily reduce the liquidity of its assets, bear risk of not being able to trade at the prices expected from the market conditions, and risk of limiting the amount of transactions.  
This may cause a negative impact on NAV, may suspend redemption request, and may delay the payment of the redemption proceeds.

### Risk Management System

- Based on the Investment Risk Management Policy set by the Board of Directors, the departments or committees in charge at the Management Company, which are independent from the fund management departments, will manage the risks by monitoring and oversighting, directly or indirectly, the fund management departments.
- The management company will establish rules for liquidity risk management, monitor the liquidity risk of the fund's assets, and formulate and validate contingency plans.
- The Board of Directors will oversee the Company's liquidity risk management system and ensure appropriate implementation of liquidity risk management.

## **Additional Items**

### ■ Points to note in relation to fluctuations of NAV per unit

The Fund aims to match the rate of change of NAV per unit of the Fund to that of Nikkei 225 Total Return Index. However, we cannot guarantee that movements of NAV per unit will be exactly identical to those of the index for the following reasons:

- (a) We cannot make composition ratio of individual stocks in the Fund to be identically the same as the Index in terms of total market capitalization.
- (b) The Fund may incur expenses including management fees (trust fees), brokerage commissions, etc.
- (c) The stock prices used for trade execution could differ from those used for NAV calculation.
- (d) The stock prices used for calculation of the Index could differ from those used for NAV calculation.
- (e) The movement of index future price could differ from that of the Index (when index futures is utilized).
- (f) The impact of minimum trading amount of stocks or index futures (when index future is utilized).
- (g) The impact of trade restrictions due to low liquidity of stocks or index futures (when index futures is utilized).
- (h) The impact of the replacement of stocks included in the Index or the change of Index calculation methods.
- (i) The accrual of cash position in the trust assets, which arises from additional subscriptions, dividends received, etc.
