Investment Risks

Factors to cause fluctuation of NAV per unit

- The Fund will invest in financial instruments whose prices fluctuate and as a result the NAV per unit of the Fund will also fluctuate. Therefore the invested amount will not be guaranteed and a loss of principal may be caused. All the gains and losses accrued to the trust assets will be attributable to the investors.
- Investment trusts are not deposits.

Major factors to cause fluctuation of NAV per unit:

| | |
|---|--|
| Stock Price Volatility (Price Volatility Risks, Credit Risks) | Stock price changes based on the political and economic conditions, operating results of the issuer, and market supply and demand for the security. If the issuer becomes operationally distressed or goes bankrupt, all or part of invested amount might not be returned. If the price of stocks included in the trust assets falls, the NAV per unit may fall below the invested amount. |
| Other risks | When the trust assets of the Fund are invested in money market instruments such as call loans and/or certificates of deposit, losses may accrue due to default of the issuers of such instruments (the Credit Risk). This may cause the NAV per unit to decline. |

※The factors to cause fluctuation of NAV per unit are not limited to those mentioned above.

Additional Considerations

- The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called the “cooling-off period”) is not applicable to the investment to the Fund.

Risk Management System

- Based on the Investment Risk Management Policy set by the Board of Directors, the departments or committees in charge at the Management Company, which are independent from the fund management departments, will manage the risks by monitoring and overseeing the fund management department directly or indirectly.

Additional Items

■ Points to note in relation to fluctuations of NAV per unit

The Fund aims to match the rate of change of NAV per unit of the Fund to that of MSCI JAPAN EMPOWERING WOMEN INDEX. However, we cannot guarantee that movements of NAV per unit will be exactly identical to those of the index for the following reasons:

- (a) We cannot make composition ratio of individual stocks in the Fund to be identically the same as the Index in terms of total market capitalization.
- (b) The Fund may incur expenses including management fees (trust fees), brokerage commissions, etc.
- (c) The stock prices used for trade execution could differ from those used for NAV calculation.
- (d) The stock prices used for calculation of the Index could differ from those used for NAV calculation.
- (e) The movement of index future price could differ from that of the Index (when index future is utilized).
- (f) The impact of the replacement of stocks included in the Index or the change of Index calculation methods.
- (g) The accrual of cash position in the trust assets, which arises from additional subscriptions, dividends received, etc.

※ As of the end of July, 2020, index future of MSCI JAPAN EMPOWERING WOMEN INDEX have not been utilized. Index futures other than the Index may be utilized.
